

# Smokers Needed for Research Study

We are looking for research participants to study how different cigarettes are perceived, and how this may differ between smokers with and without a diagnosis of schizophrenia.

**You may qualify for our research study if you are:**

- \* A smoker
- \* 18-60 years of age
- \* either have no psychiatric diagnosis, or have a diagnosis of schizophrenia
- \* fully vaccinated against COVID-19

Study participants make 4 visits to Maryland Psychiatric Research Center (MPRC) in Catonsville on weekdays (Mon-Fri). Two of the visits last about 2 hours each, one 6 hours, and one 8 hours.

- \* Compensation: \$18/hour

**For a **confidential** screening or more information:**
